

The Install Automation Demonstration Home

Install Automation's 7000 sq ft demonstration home allows visitors to experience the latest in home automation systems. The property consists of 28 fully integrated rooms, all delivering a combination of centralised audio, video and lighting control.

The unique aspect to Install Automation's demonstration property is that every element of our system can be viewed and explained in a real home. There is more of a social aspect to the home tours rather than a conventional showroom demonstration.

To request an appointment between Monday and Friday 9am-4pm, please contact jane.whitehead@installautomation.com 0121-200-1031
